FEATURE DELIVERY — TEST SIGN-OFF SHEET

NHS CRM — Implementation Tick List

NEW HOME SOLUTIONS
SALESFORCE TRAINING ORG

PREPARED: 21 April 2026 **ORG:** Training Sandbox **OWNER:** Deepak K Rana, CRM Mates Ltd **VERSION:** 1.0

TODAY — 21 APRIL 2026

#	FEATURE	JORDAN TEST	GINA TEST	WILL TEST
1	**Fix: Generate PDF button on Application page** Case-sensitivity on handler + missing loader modal markup — now shows spinner and downloads the PDF.	☐	☐	☐
2	**Create Application — Manual address entry** New "Enter Manually" toggle in Property Details when search has no result; manual grid for Street / City / Postcode / Country.	☐	☐	☐
3	**"Go to Application" button on submission success** Success screen now shows Download PDF + Go to Application — clicks through to the new Opportunity record.	☐	☐	☐
4	**Quick Summary — Property Description self-heal** Derives "Apartment 2 Bed" from linked Property type + bedrooms when Opportunity field is blank. No data migration needed.	☐	☐	☐
5	**Vendor Households — creation & backfill** New applications create a "{Surname} Household" Account and link both vendors to it. 137 historical applications re-parented (179 vendor contacts).	☐	☐	☐
6	**Housebuilder Detail — Edit modal** Sage-branded Edit button in hero header; modal edits name / email / phone / website / address with phone-format validation.	☐	☐	☐
7	**Vendors list — Account column** New "Account" column on the Vendors tab shows each vendor's Household Account with a clickable link.	☐	☐	☐
8	**Project Plan Kanban — auto-reload after save** Removed stale Apex cache; new tasks appear instantly after save.	☐	☐	☐
9	**Project Plan Kanban — drag & drop with animation** Card ghost + column highlight + optimistic "landing pop" animation (0.45s cubic-bezier). Silent revert on server failure.	☐	☐	☐
10	**Valuation Ready — smart eligibility rules** If Agent 1 = NHS: require Agents 2 & 3 figures only. Else: all 3 agents need Initial / Target / Bottom. Unassigned Agent 1 never qualifies.	☐	☐	☐
11	**Twilio sync — scheduler stopped** Aborted Notify Message Sync Failure + Monthly Archive jobs (Twilio not in use). Stopped the email flood.	☐	☐	☐
12	**Fix: Create Application infinite-loop crash** Null-safe Apex + guarded @wire so getAccountFileUrl never fires with a blank ID.	☐	☐	☐

YESTERDAY — 20 APRIL 2026

#	FEATURE	JORDAN TEST	GINA TEST	WILL TEST
13	**Comms Hub — Box file attachments in compose** Attach from Box button with tree-view picker, multi-select, sizes. Box Download CDN whitelisted.	☐	☐	☐
14	**Comms Hub — attachments appear on sent emails** Post-send linking saves Box + uploaded files to the EmailMessage so they show in Comms History.	☐	☐	☐
15	**Comms Hub — Reply / Forward formatting** Reply pre-fills quoted body; Forward uses standard forwarded-message header.	☐	☐	☐
16	**Per-agent Valuation Report upload (Agent 1 / 2 / 3)** Dashed placeholder under each agent; uploads to Box Valuations subfolder prefixed "Agent N".	☐	☐	☐
17	**Assign Agent — Map view (List / Map toggle)** Property pin, available agents blue, assigned agents orange, dashed radius circle. Overlapping pins fan out 50m.	☐	☐	☐
18	**NHS Project Plan — object & Kanban** New parent/child objects. Kanban with 4 priority columns, category-tinted cards, Active/History tabs, 46 historical tasks seeded.	☐	☐	☐
19	**Mapbox dual-provider integration** Auto / Mapbox / Google Maps switch, daily quota counter, Mapbox + Google fallback, health checks on NHS Config.	☐	☐	☐
20	**Housebuilder custom module** + New Housebuilder inline form (logo to Box, contacts), dedicated record page with hero header, 3 tabs (Contacts list / Applications with colour-coded stages / Comms History).	☐	☐	☐
